

Geology and Landscape for the Future

Geodiversity Action Plan for Herefordshire

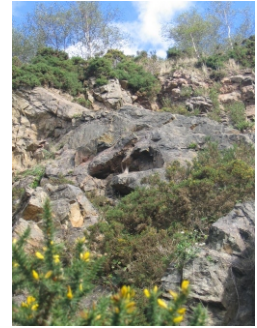

Have your say.

Proposed aim

To look after Herefordshire's special natural environment by conserving, enhancing and managing the county's geology and landscape diversity for the benefit of all.

Old Red Sandstone cliffs Ross-on-Wye

Malvern Hills

Audit sites, resources and skills in Herefordshire

Protect, conserve and enhance special sites

Involve local communities

Provide guidance for planners, landowners, individuals and organisations

Maintain the momentum of geoconservation and ensure its long term sustainability

Develop geological education programmes

Promote geotourism

Increase awareness, understanding and appreciation of geology and landscape

Augment/ upgrade county's Regionally Important Geological and Geomorphological Sites (RIGS)

The Lugg near Byton

Geodiversity Action Plan Questionnaire

Help to look after the special landscape and geology of Herefordshire.

1. Do you enjoy Herefordshire's beautiful countryside?
2. Would you like to learn more about how the landscape has evolved and how the rocks tell the history of the earth?

Geodiversity means "the variety of rocks, fossils, minerals, landforms and soils along with the natural processes which shape the landscape."
(English Nature 2004)

Waterfall in the Olchon Valley

Carboniferous Crease Limestone
King Arthur's Cave

3. Do you know of other groups or individuals who would like to be partners or consultees in the project?
4. Do you know of special sites in your area?
5. What issues are of most importance to you and your group?

For further information, to send comments or if you would like to volunteer to be involved in this project please contact Moira Jenkins at the address below by 15th February 2007.
